

Joana/Mancow's Leveling guide for Horde

NOTE: that this is what I do to level, I do some stuff that some of you may think like, "what?, what about Hillsbrad?", yes I skip most of Hillsbrad, but this is just part of how I level. And also, I mainly solo the whole game, when I'm playing on new servers, I can't group with anybody cause I'm always like 10 levels above everybody else, so I have to solo everything, but I will also explain stuff you can do with groups. Before I get started on my leveling pattern, I'm gonna start to say how I came up with my pattern.

The first time I went through the game, I attempted virtually EVERY quest, by doing this I learned what quests are worth doing, and which quests should be avoided (because some quests are not good enough for the time/XP reward, and some quests are just down right too hard to solo at certain levels. How did I find out about all the quests? Easy, websites such as Thottbot.com and wow.allakhazam.com show you EVERY quest in the game, and give huge amounts of detail about where all the quest mobs/items are at, and how much the XP reward is for it and everything. And the first time I went through the game I read EVERY quest description and took my time REAL slowly, learning everything I can about the game, I tried every profession, I did every instance like at least 5 times, and (with my dedication) I studied websites on every instance, about the loot from the mobs, all the quests for them, and the correct way to do each one. As I played through the game the first time I constantly pressed "M" key to see the map to see where I was, so I can memorize the game world and where everything is at exactly (heck I still do that now!). This guide has only been in my head, until now. This quest pattern in my opinion is VERY accurate and will show people the fastest way to do most of all the Horde quests in the game in the least amount of time and will give other hints on how to do them too. This is the same questing pattern I used to get 4 days 20 hours /played time to 60 on a new server, and has even been revised for the better!

Also the quest patterns are pretty much the same no matter what class you choose (except you have to do your class's quests which aren't a whole lot). I'm going to give my quest patterns starting with a hunter in Durotar.

If you come across any quest that you don't know where or how to do it, simply look it up at either wow.allakhazam.com or Thottbot.com, they will tell you everything about the quest. If you are confused as to where the specific zones are at, then [this map](#) should help you find them.

PLEASE READ! (HOW TO USE THIS GUIDE): All quests and mob links are colored in **BLUE**. All quests are linked to both Thottbot and Allakhazam, you can see this by the last two letters in each quest link will take you to Thottbot instead of Allakhazam.

ABOUT THE VIDEOS: All video links are in **RED**, All videos are linked to both Stage6 and Google Video. Now keep in mind Stage6 has MUCH higher video quality than Google video. Always try Stage6 first, if there is a problem with Stage6 (Sometimes Stage6 can take a bit longer to load the videos, however most of the time Stage6 will work really fast and efficient, Stage6 is going through an Alpha phase at the time of this writing, so you may experience some slow downs or issues from time to time, that is why I provide a mirror link (Google video), use Google video only if you have problems with Stage6. All these videos were recorded in Divx, Stage6 only shows Divx videos, so again it has MUCH higher quality for my videos, Google Video takes the quality away from my videos big time. The last letter in each short video link will take you to Google video instead. Mirrors are provided if there is an issue with one of the links. This video was recorded on Jubei'Thos server, and shows me going from 1-60 in 4 days 20 hours /played time, and first to 60 on that server! Make sure you go to [Divx.com](#) and download and install the latest Divx codec so you can view my videos properly.

Keep in mind the text guide is actually more up to date than the video its self. I have a few slightly modified questing patterns in the text guide that don't match the video, the ones in the text are more accurate.

HUNTER ONLY PARTS: All text colored in **MAROON** are hunter specific ONLY.

NOTE: Please refer to the [end of the guide](#) for regular tips and tricks that will help you level faster!

(See this Video [59-60] on how I do the Owl Grind.)

Tips/tricks that will help you level faster:

1. If your goal is to level really fast, then your gonna have to stop worrying about professions, they will slow you down if anything. The only profession I use is First Aid.
2. Always make sure you have the latest up to date food/drink, regenerating mana/life faster from eating/drinking is VERY important to leveling faster. So as soon as you hit 15/25/35/45, upgrade your food/water immediately.
3. I strategically use hearth stones through out the whole game, if you have to hearth and there still is a cooldown, then logging out of the game, will still make the cooldown tick. This will help you get a better /played time at the end.
4. Practice makes perfect, I can't stress this enough, the more times you go through the game to 60, the faster you get at it, it's as simple as that.
5. Plan ahead. While questing, always know what your going to do next.
6. Use Auto-Run a lot, you can still type and do other stuff while auto-running.
7. If your goal is to get a VERY good /played time to 60, then NEVER do BGs, NEVER go to the AH (see below), NEVER go AFK, NEVER go to the ARENA in STV.
8. You should always have a bank/AH alt on every server you have a main character on. This is VERY important. I consistently use the mail system as a "bank", Any time im out questing and find a bunch of greens or items that will sell in the AH, I DO NOT go to the AH with that character to put it in the AH, instead I send them all to an ALT through the mailbox. Then with the ALT, ill put them in the AH. Also, I

Hunter specific tips/tricks::

1. before taming a pet, lay down a frost trap, so the mob freezes solid for a while, instead of having it hit you repeatedly.
2. while drinking, have your pet start attacking something.
3. Learn to use immolation traps a lot. One method I use through out the whole game is: lay down an immolation trap, then serpent sting a mob, have that mob run into the immolation trap, while that mob is taking damage and im tanking it, me and my pet are killing another mob.
4. If a mob has the ability to heal them self, use Intimidation to stop them from healing. (Or scatter-shot if your MM speced)
5. Use a [macro](#) to feed your pet, this saves time and frustration.
6. consistently use all your hunter's abilities, use BW/Rapid Fire/Arcane Shot, as soon as the cooldown is up every time. Use a UI add-on that help you see the cooldowns better (like what I use, which is called Cooldown Count mod).
7. Multi-shot single mobs (or even players in PVP). Multi-shots adds an extra free shot (similar to arcane shot) in the shoot cycle. Through out the game check and see if your multi-shots are doing more damage per mana than arcane shots, if so, use multi-shots more often (even on single mobs).
8. Use bandages to heal your pets sometimes instead of using mend pet, this saves your mana, and (depending on the bandage) can heal more HPs up.
9. I personally use a cat as my main pet mainly because it does the most DPS out of all pets. Popular pets such as the Rake are no better than a

strategically use the mail box as a "storage system". For example, I have a bunch of Silk Cloth in my inventory, that im going to use later, but not now, instead of it wasting space in my inventory, ill send it to my ALT, then from my ALT, ill send it right back to my main, so it sits in my mailbox, when I need it.

9. Before I go out questing, I make sure I have plenty of food/water /bullets or arrows/and repaired, so I can last hours before returning to town.

10. Don t think just because your inventory is filled you have to go back to town to empty it every time, I consistently destroy items to make room for quest items or items that are more important.

11. Use the new built in auto loot feature that has been implemented in patch 2.0! This can speed up leveling a lot, since you won't have to manually loot every corpse. To enable this, go to Interface Options, then put a check next to "Auto Loot Corpse". I am finally glad they implemented this!

12. Don t loot every mob! If your goal is to level like a madman, then don t loot mobs that would waste too much time. Although the higher the level I get the more percent chance that I will loot mobs. here's a rough estimate of whether I loot mobs or not:

1M - % chance to loot

1-10 - 97% I loot more here cause I don t have a pet yet, so the mob drops dead right where im at each time.

10-20 - 70%

20-30 - 80%

30-40 - 87%

40-50 - 95%

50-60 - 98%

How do I determine whether or not I loot? Many factors comes in to play here, like if my inventory is full or not, or how much time it would take to go loot a mob then continue on, or if it's a beast type mob (which don t drop cloth/money).

13. Many people have asked me if instances are a waste of time. No, they are worth doing, but only if you have a good group to do them. I personally skip instances while racing myself to 60, cause I don t want to take the chance that I will have a bad group. But if your just playing casually, then I recommend doing them.

14. If your goal is to level real fast then stick with one type of weapon the whole game. I choose to stick with staves the WHOLE game, even if I find an epic whatever, I stick with staffs, cause it slows you down when you have to level up new weapons. Plus, I get staff quest rewards along the way. Although if you refuse this tip, then if you want to level up a new weapon faster, you can use your abilities (which counts as extra weapon hits), such as disengage/raptor strike/Mongoose Bite/Wing Clip for melee weapons, which will help level up your weapons faster.

15. from my experience gear is overrated, people think gear is too important for everything (even leveling faster). Well, from my experience it's not that important, your character does most of it's damage from it's actual character level and its skills/abilities and your pet's damage (if your a hunter), and from better bullets/arrows/scopes. I could use a low level green bow/gun all the way to 60, or a high level epic bow/gun all the way to 60, and I betcha my final /played time will hardly be no difference at all. So don't panic if your stuck with a lower level green for awhile. As a matter of fact, on JubeiThos server (the server I finished with a final time of 4 days 20 hours), I used a level 36 green bow all the way to level 57, I then found a level 50 green gun at level 57 that I used to 60. Through out all my speed runs I never buy weapons/armor in the AH to use, I save my money so I have enough to buy a mount (which I usually am able to afford at level 45), you ll find sufficient weapon/armor from mob drops and quest rewards. The only thing I do buy from the auction hall is scopes, better bags, better ammo/arrow bags, and maybe a better bow/gun, that s it.

16. I get asked a lot why I choose troll rather than orc for a hunter. The racial bonuses between orc and troll are pretty much an even choice so it came down to looks for me. Although I do believe the troll beserking ability can be a life saver, but the orc s 5% pet damage is not really much of a life saver.

17. Avoid grinding as much as possible, if you want to get to 60 faster, easier, and with less boredom, then learn to do the quests instead. I actually spend a lot of time flying/riding around turning in quests or

regular cat for PvE, but for PvP it can make a slight difference.

moving to the next area (which is still faster than grinding). And while doing all that flying, I take breaks to eat (in RL) or whatever. If your grinding, you have to be there non-stop. Not to mention, questing increases your reputations a lot, compared to grinding, which hardly doesn't at all. Questing is the way to play this game, not grinding.

18. Turn off auto camera and use your mouse to manually adjust your vision. Also crank up your mouse sensitivity high, so you can look around much faster.

Joana, how long did it take you to come up with these awesome leveling routes?

Good question, I went through 8 different horde characters, racing myself to 60 on new servers with each one, I was the first to 60 every time, but my main goal was not first to 60 but a better /played time with each attempt. With each race I basically paid very close attention to every little detail on the fastest way to do the quests etc.. Then in-between new servers, I would spend all my time trying to figure out how to do the next server even faster! I had went through several test characters to find the best grinding spots, figuring out which quests to skip and finding more quests I could do (by looking them up on wow.allakhazam.com or Thottbot.com) Each time improving upon my memorization of everything, I put a LOT of thought in this whole leveling process. I spent literally about 6 solid months doing nothing but coming up with this leveling pattern you have here.

What UI Mods do I use?

I get asked this a lot! I use cosmos UI (www.cosmosui.org) but I only use a few mods that come with it, mainly "Cooldown Count" (the mod that shows the cooldowns of my abilities in yellow on the action bar), "Bar Options" (the only reason I use this is for the "out of range coloring" option), "Census Plus" (which allows me to see a whole census of the current faction side of the server, all the players and their levels in nice graphs), "PopBar" (this is the UI mod that allows me to drop spells/abilities/macros in that huge box on the lower right hand side of the screen, I then have all of those hot keyed for easy game play), "Scrolling Combat Text" (SCT) (I turn everything off on this except the "show dodges", this tells me when I can use the Mongoose Bite ability, since you can only do those after dodges), and a few other minor UI mods (such as map coordinates etc.). I also use a mod I HIGHLY recommend called "[AutoProfit](#)", which simply sells all gray items you have in your bags to the vendor at once.

If you're into RAIDING you may want to look into other mods that will help you with groups better, you can check out www.curse-gaming.com for all kinds of different UI mods that will help your class or your play style.
